## The Problem.

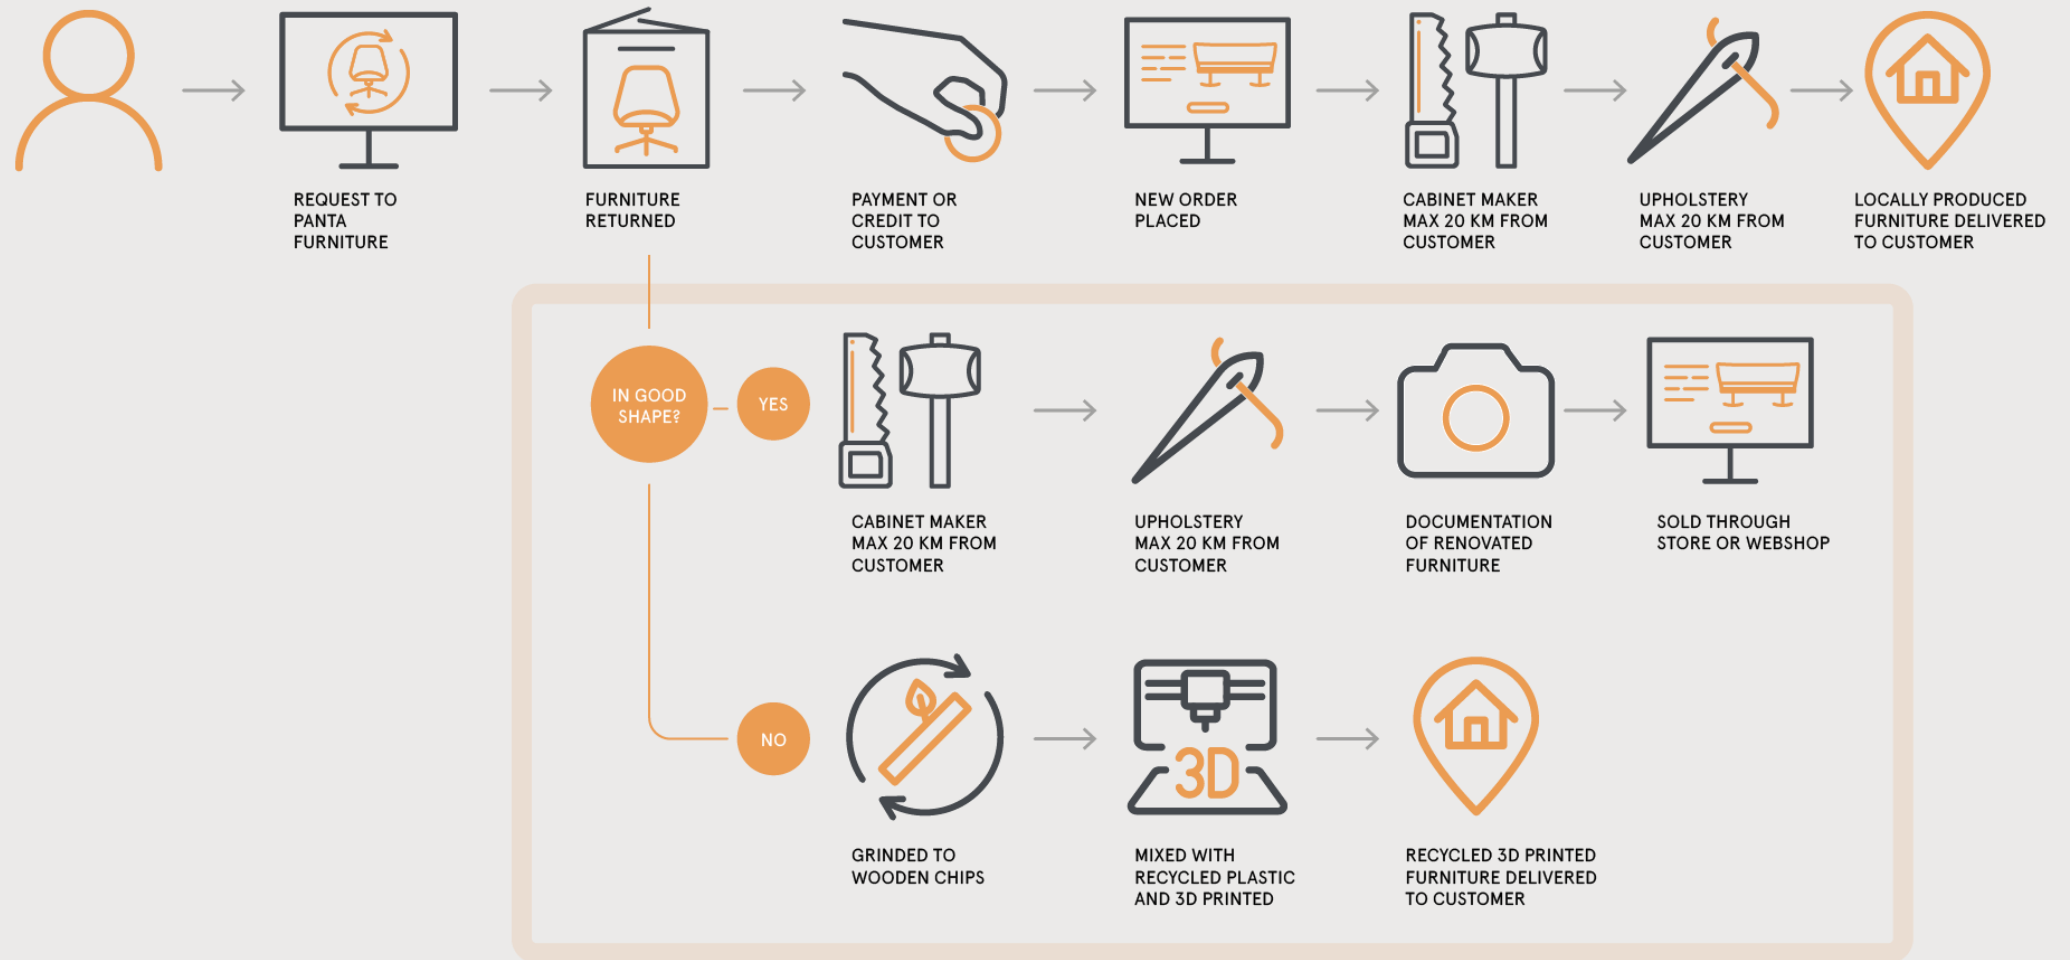

Each year, millions of tons of furniture are thrown away world wide.

Less than 30% are recycled.

## This is How. Globally oriented. Locally aware.

Our goal is to make 100% circular furniture that are locally produced, with local material, in the country where the customer lives.

Do you want it handcrafted or  
3D printed?

Our vision is to change the way furniture  
manufacturing works worldwide.

## 3D printed furniture today.

We are looking for collaborations.

Such as schools, designers, interior decorators, 3Dprint engineers and others who want to join our journey.
